International Journal of
QUANTUM CHEMISTRY

Contents for Volume 43, 1992, Nos. 1–6 and 44, 1992, Nos. 1–6

Issue No. 1, July 5, 1992

Announcement from the Publisher 1

Editorial
P.-O. Löwdin 3

Electronic Structure Studies of Nonlinear Optical Response in Molecules: An Introduction
M. Ratner 5

On the Calculation of the Hyperpolarizabilities of Organic Molecules by the Sum Over Virtual Excited States Method
J.O. Morley, P. Pavlides, and D. Pugh 7

A Simplified Three-Level Model Describing the Molecular Third-Order Nonlinear Optical Susceptibility
C.W. Dirk, L.-T. Cheng, and M.G. Kuzyk 27

Exact Nonlinear Optical Coefficients of Quantum Cell Models with Interacting Electrons
Z.G. Soos, P.C.M. McWilliams, and G.W. Hayden 37

Calculation of Quadratic Hyperpolarizabilities for Organic π Electron Chromophores: Molecular Geometry Sensitivity of Second-Order Nonlinear Optical Response
D.R. Kanis, T.J. Marks, and M.A. Ratner 61

A Dispersion Formula for the Second Dynamic Hyperpolarizability as Exemplified by Helium
D.M. Bishop and J. Pipin 83

The Calculation of Frequency-Dependent Hyperpolarizabilities Including Electron Correlation Effects
J.E. Rice and N.C. Handy 91

New Algorithm for High-Order Time-Dependent Hartree–Fock Theory for Nonlinear Optical Properties
H. Sekino and R.J. Bartlett 119

H. Sekino and R.J. Bartlett 119

Evolution of Polarizabilities and Hyperpolarizabilities with Molecular Aggregation: A Model Study of Acetylene Clusters
J. D. Augspurger and C. E. Dykstra 135

Nonlinear Optical Properties of Conjugated Polymers from Ab Initio Finite Oligomer Calculations
B. Kirtman 147

Theory of Molecular Optoelectronics. IX. Calculation of $\chi^{(2)}$ from Theoretical Hyperpolarizabilities for DAN
R. W. Munn 159

Guidelines for Preparing an Electronic Manuscript 171

Issue No. 2, July 15, 1992

The Application of the Graph-Theoretical Method in the QSAR Scheme: Possibilities and Limits
K. Romanowska 175

Broken Symmetry in the Electronic Structure of the Ferrocene Molecule
D. B. Cook 197

Complex Scaling for Subsets of Coordinates and Associated Virial-Type Relations
M. Garcia-Sucre 209

Molecular Structure and Polarity of the C_3NH Carbene
J. Bosco, P. Da Silva and M. N. Ramos 215

Formulation of the Coupled Cluster Theory with Localized Orbitals in Correlation Calculations on Polymers
W. Förner 221

Variation–Iteration Method for One-Dimensional Two-Electron Systems
S. V. Katyurin and O. B. Glinkin 251

Green's Function Calculations Using Non-Hartree–Fock Orbitals
L. J. Holleboom and J. G. Snijders 259

Computation of Two-, Three-, and Four-Center Exchange Integrals Over Slater Basis by Means of Optimized Gaussian Expansions
R. Montagnani and O. Salvetti 273

Algebraic Formulae of Matrix Elements Between Valence-Bond Determinants for Periodic Systems: The One-Band Linear Case
A. Fortunelli 281

Applications of *n*-Electron Wave Functions Built Up with Two Kinds of Geminals
C. Liu, C. Deng, B. Jin, and H. Hu 301

Announcement 311

Issue No. 3, July 20, 1992

Saddle-Point Expansion in Molecular-Orbital Theory
J. Marañón 313

A Calculation of Exciton Energies in Periodic Systems with Helical Symmetry: Application to a Hydrogen Fluoride Chain
M.G. Vracko and M. Zaider 321

Calculation of ^{13}C-NMR Chemical Shift Using the Intermediate Neglect of Differential Overlap Model
J. D. Baker and M.C. Zerner 327

Study on Some Metal–Metal Quadruple Bonds
M. Li 343

Orbitally Resolved Charge Sensitivity Analysis: Basic Concepts and Relations
R. F. Nalewajski and J. Mrozek 353

Representation of Square-Cell Configurations in the Complex Plane: Tools for the Characterization of Molecular Monolayers and Cross Sections of Molecular Surfaces
P. D. Walker and P.G. Mezey 375

Nonadiabatic Theory of Electron–Vibrational Coupling: New Basis for Microscopic Interpretation of Superconductivity
M. Svrček, P. Baňacký, and A. Zajac 393

Molecular Aspects of Superconductivity: The Role of the One-Particle Term at the Gap Formation
M. Svrček, P. Baňacký, and A. Zajac 415

Superconductivity—The Phenomenon Conditioned by Nuclear Microflows in Nonadiabatic Systems
M. Svrček, P. Baňacký, and A. Zajac 425

Erratum

Normal (Decoupled) Representation of Electronegativity Equalization Equations in a Molecule
R. F. Nalewajski 443

Guidelines for Preparing an Electronic Manuscript 445

Issue No. 4, July 30, 1992

Theoretical Study on Solvation Effects in Chemical Reactions: A Vibrational Coupling Model
H. Tachikawa, S. Lunell, C. Törnkvist, and A. Lund 449

The Accurate Calculation of Dipole Moments and Dipole Polarizabilities Using Gaussian-Based Density Functional Methods
F. Sim, D. R. Salahub, and S. Chin 463

A Gauge Symmetric Band Model of the Woodward–Hoffmann Rules
A. E. Squire and R. H. Squire 481

Quantum Molecular Study of Sulfur Mustard
H. Broch, R. Viani, and D. Vasilescu 511

Calculation of the Probabilities for Transitions into the Continuous Spectrum by Using the L_2 Basis: A New Method of Solving the Wave-Function Renormalization Problem
G.V. Smelov 531

Superconductivity and the Effective Electron–Electron Interaction Mechanism in the Light of the Configuration Interaction Study
M. Svrček, P. Baňacký, and A. Zajac 551

Local Hammond Postulate and a Local Model for Monitoring Reaction Paths
D. Majumdar, S. P. Bhattacharyya, and D. K. Maity 567

Ab Initio MO Calculations on the Stability of the CF_4^+, PF_5^+, SF_6^+, and MoF_6^+ Ions with the F1*s* Core Hole
A.G. Falaleyev, V.A. Andreyev, and V.I. Vovna 573

Electric-Field Mapping of Some Substituted 3-Pyridinecarboxylic Acid Cardiotonics and the Possible Structure–Activity Relationships
A. Kumar, A. K. Bhattacharjee, and P.C. Mishra 579

Guidelines for Preparing an Electronic Manuscript 591

Issue No. 5, August 5, 1992

Polystyrene Models. II. Ab Initio Study of Isobutylbenzene
J. B. Lagowski, I. G. Csizmadia, and G. J. Vancso 595

Classical Trajectories for Two Ring-Shaped Potentials
M. Kibler, G.-H. Lamot, and P. Winternitz 625

Relations Among Functional Groups within a Stoichiometry: A Nuclear Configuration Space Approach
J.-E. Dubois and P. G. Mezey 647

On the Calculation of First-Order Properties: Expectation Value Versus Energy Derivative Approach
M. Ernzerhof, C. M. Marian, and S. D. Peyerimhoff 659

Ab Initio Study on the Mechanism of Cycloaddition Reaction of Ketene with Methylenimine: A New Reaction Scheme
D. Fang and X. Fu 669

Variational Principle and Path Integrals for Atoms in Molecules
P. F. Zou and R. F. W. Bader 677

Small-Angle Electron Scattering by Formaldehyde and Ketene: Effects of Electron Correlation and Chemical Binding
Y. Sasaki, H. Takeuchi, S. Konaka, and M. Kimura 701

The Rotation–Vibration Coupling Equations for Polyatomic Molecules in Internal Coordinates
G.-J. Chen, A.-C. Tang, and X.-Y. Fu 713

Announcement 725

Guidelines for Preparing an Electronic Manuscript 729

Issue No. 6, August 10, 1992

Linear Dependence in Basis-Set Calculations for Extended Systems
G. Aissing and H. J. Monkhorst 733

Improving an Algebraic Approach to Calculate Approximate Franck–Condon Factors of Diatomic Molecules
J. F. Rivas-Silva, G. Campoy, and A. Palma 747

Different Forms of Perturbation Theory for the Calculation of the Correlation Energy
C. Murray and E. R. Davidson 755

Formulation of *N*- and *v*-Representable Density Functional Theory. V. Exchange-Only Self-Consistent Field
E. S. Kryachko and E.V. Ludeña 769

Proton Affinities of Molecules Containing Nitrogen and Oxygen: Comparing Ab Initio and Semiempirical Results to Experiments
J. L. Ozment and Ann M. Schmiedekamp 783

A BSSE-Free SCF Algorithm for Intermolecular Interactions. II. Sample Calculations on Hydrogen-Bonded Complexes
Á. Vibók and I. Mayer 801

Comparative Semiempirical Calculations of Tetrazole Derivatives
O. A. Ivashkevich, P. N. Gaponik, A. O. Koren, O. N. Bubel, and E. V. Fronchek 813

CASSCF Optimization Problem for a Group of Excited States
Yu. G. Khait and A. I. Panin 827

On Coordinate Transformations in Steepest Descent Path and Stationary Point Locations
A. Banerjee and N. P. Adams 855

Guidelines for Preparing an Electronic Manuscript 873

Issue No. 1, August 20, 1992

The Dynamic and the Stochastic Reaction Rate Approaches to Nonradiative Processes in Condensed Media
S. G. Christov 1

The Variation of Spectroscopic Properties with Numbers of Electrons
B. J. Laurenzi and D. R. Gaylord 17

On the Combination of Two Methods for the Calculation of Multicenter Integrals Using Exponential-Type Orbitals
V. I. Perevozchikov, I. V. Maslov, A. W. Niukkanen, H. H. Homeier, and E. O. Steinborn 45

An Accurate Lower-Bound Calculation of the Lowest Triplet States of He and Its Isoelectronic Series
H. Kleindienst and U. De Groot 59

Internal Orbitally Resolved Charge Sensitivity Analysis
R. F. Nalewajski 67

Intermolecular Interactions of Methyl Acetate, β-Propiolactone, Ethyl Acetate, and γ-Butyrolactone. An AM1 Semiempirical Study
N. Bodor and M.-J. Huang 81

Guidelines for Preparing an Electronic Manuscript 91

Issue No. 2, September 5, 1992

Introduction
G. Loew 95

List of Participants 97

An Analysis of Molecular Electrostatic Potentials Obtained by a Local Density Functional Approach
J. S. Murray, J. M. Seminario, M. C. Concha, and P. Politzer 113

Maximum Overlap Symmetry Molecular Orbital Model
C.-G. Zhan 123

Molecular Conformation of Bilirubin from Semiempirical Molecular Orbital Calculations
W. L. Shelver, H. Rosenberg, and W. H. Shelver 141

A Search for Properties Which Produce Discrimination Between Cannabinoid Psychoactivity and Analgesic Activity
P. H. Reggio 165

Conformational Studies of (*S*)Idazoxan and (*S*)Methoxyidazoxan Using AM1 and PM3 Semiempirical Molecular Orbital Methods
S. Hariharan and W. H. Shelver 181

Quantum Mechanical Parametrization of a Conformationally Dependent Hydrophobic Index
I. Alkorta and H. O. Villar 203

Empirical Methods for Computing Molecular Partition Coefficients: II. Inclusion of Conformational Flexibility within Fragment-Based Approaches
N. G. J. Richards, P. B. Williams, and M. S. Tute 219

Structural and Electronic Requirements for Binding at the Mu-Opioid Receptor
C. Cometta-Morini and G. H. Loew 235

Role of Axial Ligand in the Electronic Structure of Model Compound I Complexes
P. Du and G. H. Loew 251

Conformational Study of Met-Enkephalin in Its Zwitterionic Form
J. J. Perez, G. H. Loew, and H. O. Villar 263

Do Intelligent Configuration Search Techniques Outperform Random Search for Large Molecules?
R. S. Judson, M. E. Colvin, J. C. Meza, A. Huffer, and D. Gutierrez 277

Modeling Solvent Effects in Molecular Dynamics Simulations of Proteins
T. Solmajer and E. L. Mehler 291

Biuret and Its Sulfur Analogs: Structures and Energies
J. Leszczyński and R. H. Sullivan 301

Guidelines for Preparing an Electronic Manuscript 315

Issue No. 3, September 30, 1992

An Ab Initio Study of Tautomerism Between Formhydroxamic Acid and Formhydroximic Acid
Tao Yuanqi and Duan Wengui 319

Substituents Effects in Phospha Alkynes: A Computational Investigation
K. Jayasuriya 327

Investigating the Possibility of Simultaneously Finding an Electron-Hole and an Electron-Pair in a Molecule: Delocalization Competition of Ionic vs. Covalent Character, and Related Effects in Push–Pull Ethylenes
P. Karafiloglou and E. Sánchez Marcos 337

Theoretical Study of the Thermal Unimolecular Rearrangement of Fluoroethylidenes
R. Kakkar and V. Walia 363

A Molecular Orbital Treatment of the Electronic Spectra of Some Tryptamines
M. M. Hamed, R. H. Abu-Eittah, Z. Mobark, and M. M. Abdou 379

Electronic Hamiltonian of Diatomic Molecules in the Basis of Coupled Momenta Eigenfunctions
V. Kruglevsky 393

Simplified Derivation of a One-Range Addition Theorem of the Yukawa Potential
H. H. H. Homeier, E. J. Weniger, and E. O. Steinborn 405

Erratum 413

Guidelines for Preparing an Electronic Manuscript 415

Issue No. 4, October 5, 1992

Michael J. S. Dewar 419

Introduction to the Paper Symposium on Semiempirical Methods in Quantum Chemistry and Solid-State Theory
P. Löwdin and M.C. Zerner 421

Biographical Notes 423

The Semiempirical Approach to Chemistry
M. J. S. Dewar 427

MNDO Calculations as a Valuable Tool for Structure Evaluation of Contact Ion Pairs
Z. Havlas, S. Nick, and H. Bock 449

Transition-State Structures for the Reaction Between Styrene and *t*-Butyl Cyanoketene: Theoretical Evidence for Antarafacial Characteristics in a $\pi^2 + \pi^2$ Thermal Cycloaddition
H. S. Rzepa and W. A. Wylie 469

Semiempirical Calculations of TiO_2 (Rutile) Clusters
A. Hagfeldt, H. Siegbahn, S.-E. Lindquist, and S. Lunell 477

Semiempirical Calculations of Hyperpolarizabilities for Extended π Systems: Polyenes, Polyynes, and Polyphenyls
N. Matsuzawa, and D. A. Dixon 497

Consistent Parametrization of Semiempirical MO Methods
K. Jug and M. Krack 517

Comparison of MNDO to Tight-Binding, Total Energy Methods for Surface Atomic Structure Determination: Aluminum Phosphide (110)
T. J. Godin and J. P. LaFemina 533

Peptide Conformational Analysis Using the TRIPOS Force Field
C. G. Wall, E. F. Healy, and M. A. Fox 543

A Semiempirical SCF MO Study of the Interaction of Odorant Molecules with a Biological Substrate
C. S. Wu, L. J. Myers, and S. D. Worley 549

NDDO/MC: A New Semiempirical SCF MO Method for Transition Metal Complexes
M. J. Filatov, I. L. Zilberberg, and G. M. Zhidomirov 565

Prototropic Changes in Cationic Base-Pair Adducts. I. Guanine Protonation
G. P. Ford and B. Wang 587

Prototropic Changes in Cationic Base-Pair Adducts. II. Guanine Methylation
G. P. Ford and B. Wang 605

Simulated Annealing to Locate Various Stationary Points in Semiempirical Methods
F. Bockisch, D. Liotard, J.-C. Rayez, and B. Duguay 619

Spin-Independent Three-Body Effective Valence-Shell Operators: Application to Molecular Oxygen
A. W. Kanzler, K. F. Freed, and M. G. Sheppard 643

Guidelines for Preparing an Electronic Manuscript 675

Issue No. 5, November 5, 1992

Effect of Hydrogen Bonding and Cooperativity on Stretching Force Constants of Formamide
M. C. Shivaglal and S. Singh 679

Novel Pentacoordinated Bridged Silicon Anions
L. P. Davis, L. W. Burggraf, and M. S. Gordon 691

A Semiempirical Study of the Reaction of the Hemimercaptal of Methylglyoxal and Glutathione at the Active Center of Glyoxalase I
O. N. Ventura and M. L. Cubas 699

Algorithmic Tools in the Study of Semiempirical Potential Surfaces
D. A. Liotard 723

On the Implications of the Structure of 3′-Azido-3′-deoxythymidine and Related Compounds to Antiviral Activity
J. D. Da Motta Neto, M. C. Zerner, and R. Bicca De Alencastro 743

An AM1 Study of the Coupling Reaction of Radicals with the Acetone Enolate Ion and Some Related Nucleophiles
A. B. Pierini, G. L. Borosky, and M. T. Baumgartner 759

Semiempirical Calculations of Molecular Polarizabilities and Hyperpolarizabilities of Polycyclic Aromatic Compounds
Y.-J. Lu and S.-L. Lee 773

A Semiempirical Investigation of Interelectronic Exchange Coupling in Bisected Poly(1,4-phenylene) Polycation Model Systems
P. M. Lahti 785

Intermediates of the Borane Reduction of Some Imidazolidines: An AM1 Study
N. Bodor and L. Prokai 795

Extension of MNDO to *d* Orbitals: Parameters and Results for the Halogens
W. Thiel and A. A. Voityuk 807

The Modified All-Valence INDO Method with the Inclusion of Spin–Orbit Coupling
S. Roszak and J. Lipiński 831

Calculation of the Long-Range Coupling Between Electrons in Lone Pairs and Double Bonds Using Semiempirical and Ab Initio Methods
M. Braga and S. Larsson 839

On the Agostic Interaction in Lanthanide Phenylene Complexes: An INDO Study of $[(Cp_2^*M)_2C_6H_4]$ (M = Sc, Lu) Employing an Energy-Partitioning Analysis
V. Jahns, S. Köstlmeier, M. Kotzian, N. Rösch, and P. L. Watson 853

A Critical Examination of H-Bonding Interactions Calculated Using the AM1 Molecular Orbital Method
J. J. Dannenberg and E. M. Evleth 869

Valence-Bond Calculations on ZnO and HgO Using Integrals Computed through the Semiempirical AM1 Method
M. Sola, M. Balcells, M. Duran, A. Lledos, and J. Bertran 887

A Combined Quantum Chemical/Molecular Mechanical Study of Hydrogen-Bonded Systems
V. V. Vasilyev, A. A. Bliznyuk, and A. A. Voityuk 897

Guidelines for Preparing an Electronic Manuscript 931

Issue No. 6, December 5, 1992

Magnetic Susceptibility of Some Derivatives of Cellulose and Their Mixtures: Theory and Experiment
A. Yu. Sadykova, A. S. Saykaeva, A. V. Kostochko, A. N. Glebov, and V. G. Moozyukov 935

Broken Symmetry Solutions of the Two-Dimensional Extended Hubbard Model and Their Instability Conditions
S. Yamamoto and M.-A. Ozaki 949

Constrained Self-Consistent-Field Wave Functions with Improved Long-Range Behavior
A. J. Thakkar, T. Koga, H. Matsuyama, and E. F. Archibong 985

A Regional Embedding Method
P. F. Zou 997

The Electronic Structure of Keggin Anion $(PW_{12}O_{40})^{3-}$ and Catalytic Properties
T. L. Chen, J. Ji, S. X. Xiao, T. X. Cai, and G. S. Yan 1015

Group Electronegativity and Fukui Function Studies of the Substituent Effects in Aromatic and Inorganic Systems
J. Korchowiec and R. F. Nalewajski 1027

Static Polarizabilities for the Ne-Isoelectronic Series Using Harbola–Sahni Potential
J. Samuel and K. D. Sen 1041

Average Virtual Orbitals in Configuration Interaction Studies with Application to the Low-Lying Singlet States of the Carbon Monoxide and Acetone Molecules
B. J. Mogensen and S. Rettrup 1045

Experimental and Computed Bond Lengths: The Importance of Their Differences
M. Hargittai and I. Hargittai 1057

Book Review

Review of Algebraic and Diagrammatic Methods in Many-Fermion Theory. By F. E. Harris, H. J. Monkhorst, and D. L. Freeman
P. Jørgensen 1069
